

Quality SMidCap Fund

Class I: WHGMX | Class Ultra: WWSMX

Data as of September 30, 2024

Investment Objective

The Westwood Quality SMidCap Fund's investment object is to seek long-term capital appreciation.

Fund Overview

We invest at the intersection of quality and value which we believe can generate a return premium resulting in lower absolute downside risk and greater risk-adjusted returns.

- Focusing on high-quality businesses with strong balance sheets, strong free cash flow and the potential for attractive future returns
- Prioritizing the quantitative assessment of absolute downside risk to mitigate against loss of capital
- Investment universe generally includes companies with market capitalization between \$500 million and \$10 billion
- High-conviction, fundamental bottom-up security selection process investing in typically 45-75 holdings

Investment Team

Name	Industry	Firm Tenure
William Costello, CFA	1987	2010
Prashant Inamdar, CFA	2000	2013
Trip Rodgers, CFA	1995	2019
Kyle Martin, CFA	2012	2016

Characteristics

	WHGMX	Russell 2500 Value Index	Russell 3000 Index
Number of Holdings	64	1,887	2,987
Return on Equity	14.0%	10.0%	22.6%

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost, and current performance may be higher or lower than the performance quoted. For performance data current to the most recent month end, please call 877.FUND.WHG.

Potential Risks

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. There are specific risks inherent in small cap investing such as greater share price volatility as compared to other funds that invest in stocks of companies with larger and potentially more stable market capitalizations. REITs are subject to changes in economic conditions, credit risk and interest rates. International investing may involve risk of capital loss from unfavorable currency fluctuations, differences in generally accepted accounting principles or from social, economic or political instability in other nations.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. This and other information can be found in the Fund's summary and full prospectuses, which may be obtained by calling 877.FUND.WHG, or by visiting our website at westwoodfunds.com. Read the prospectus carefully before investing or sending money.

Standard deviation is the statistical measure of historical volatility, a measure of the extent to which numbers are spread around their average. Upside and downside capture measures how a fund has historically performed relative to its broad market benchmark during times of market strength – or positive returns – and weakness – or negative returns. Alpha is the measure of risk-adjusted performance. Beta is the measure of risk in relation to the market or benchmark. R-Squared is the measure of how closely a portfolio's performance correlates with the performance of a benchmark. Tracking Error is the amount by which the performance of the portfolio differs from the benchmark. Sharpe Ratio is the measure of the excess return (risk premium) per unit of risk in an investment. P/E ratio is price-per-share divided by its earnings-per-share. Forward P/E is a measure of the P/E ratio using forecasted earnings for the P/E calculation. Return on Equity is a measure of the profitability of a business in relation to the equity. Russell 3000® Index is a market capitalization-weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. The index is composed of the 3,000 largest U.S. companies and represents approximately 98% of the investable U.S. equity market. The Russell 2500® Index measures the performance of the 2,500 smallest companies in the Russell 3000® Index, which represents approximately 16% of the total market capitalization of the Russell 3000® Index. The Russell 2500® Value Index measures the performance of the small to mid-cap value segment of the U.S. equity universe. It includes those Russell 2500 companies with lower price-to-book ratios and lower forecasted growth values. The Benchmark Indices' returns do not reflect any management fees, transaction costs or expenses. Investors cannot invest directly in an index.

The Westwood Funds are distributed by Ultimus Fund Distributors, LLC. (Member FINRA) Ultimus Fund Distributors and Westwood Funds (or Westwood Holdings Group, Inc.) are separate and unaffiliated.
