

Quality Value Fund

Class I: WHGLX | Class A: WWLAX | Class C: WWLCX | Class Ultra: WHGQX

Data as of March 31, 2024

Investment Objective

The Westwood Quality Value Fund's investment objective is to seek long-term capital appreciation.

Fund Overview

We invest at the intersection of quality and value which we believe can generate a return premium resulting in lower absolute downside risk and greater risk-adjusted returns.

- Focusing on high-quality businesses with strong balance sheets, strong free cash flow and the potential for attractive future returns.
- Prioritizing the quantitative assessment of absolute downside risk to mitigate against loss of capital.
- Investment universe generally includes companies with market capitalization greater than \$5 billion.
- High-conviction, fundamental bottom-up security selection process investing in typically 40-60 holdings.

Investment Team

Name	Industry	Firm Tenure
Matt Lockridge	2001	2010
Lauren Hill, CFA	2003	2015
Michael Wall	1996	2004

Potential Risks

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Portfolio holdings are subject to change and should not be considered a recommendation to buy individual securities. The Fund pursues a "value style" of investing. If the Adviser's assessment of market conditions, or a company's value or prospects for meeting or exceeding earnings expectations is inaccurate, the Fund could suffer losses or produce poor performance relative to other funds or market benchmarks. In addition, "value stocks" can continue to be undervalued by the market for long periods of time and may never achieve the Adviser's expected valuation.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information can be found in the Fund's summary and full prospectuses, which may be obtained by calling 877.FUND.WHG, or by visiting our website at westwoodfunds.com. Read the prospectus carefully before investing or sending money.

Standard deviation is the statistical measure of historical volatility, a measure of the extent to which numbers are spread around their average. Alpha is the measure of risk-adjusted performance. Beta is the measure of risk in relation to the market or benchmark. R-Squared is the measure of how closely a portfolio's performance correlates with the performance of a benchmark. Tracking Error is the amount by which the performance of the portfolio differs from the benchmark. Sharpe Ratio is the measure of the excess return (risk premium) per unit of risk in an investment. P/E ratio is price-per-share divided by its earnings-per-share. Forward P/E is a measure of the P/E ratio using forecasted earnings for the P/E calculation. Return on Equity is a measure of the profitability of a business in relation to the equity. The upside/downside capture ratio measures the ratio of the upside and downside of an investment vs a benchmark. The Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index, which represents approximately 92% of the total market capitalization of the Russell 3000® Index. The Russell 1000® Value Index measures the performance of those Russell 1000® Index companies with lower price-to-book ratios and lower forecasted growth values. The Benchmark Indices' returns do not reflect any management fees, transaction costs or expenses. Investors cannot invest directly in an index.

The Westwood Funds are distributed by Ultimus Fund Distributors, LLC. (Member FINRA) Ultimus Fund Distributors and Westwood Funds (or Westwood Holdings Group, Inc.) are separate and unaffiliated.
